Subject: Label Amendment: Emerging Viral Pathogens Claim
Product Name: Benefect Botanical Daily Cleaner Disinfectant Spray
EPA Registration Number: 84683-3
Application Date: March 10, 2020
Decision Number: 561070

Dear Nicole:

The amended label referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, is acceptable. This approval does not affect any conditions that were previously imposed on this registration. You continue to be subject to existing conditions on your registration and any deadlines connected with them.

A stamped copy of your labeling is enclosed for your records. This labeling supersedes all previously accepted labeling. You must submit one copy of the final printed labeling before you release the product for shipment with the new labeling. In accordance with 40 CFR 152.130(c), you may distribute or sell this product under the previously approved labeling for 18 months from the date of this letter. After 18 months, you may only distribute or sell this product if it bears this new revised labeling or subsequently approved labeling. "To distribute or sell" is defined under FIFRA section 2(gg) and its implementing regulation at 40 CFR 152.3.

Because you have opted to add statements pertaining to emerging viral pathogens to your label as described in the August 19, 2016, Guidance to Registrants: Process For Making Claims Against Emerging Viral Pathogens Not On EPA-Registered Disinfectant Labels ("Guidance"), https://www.epa.gov/sites/production/files/2016-09/documents/emerging_viral_pathogen_program_guidance_final_8_19_16_001_0.pdf, you are subject to the following additional terms of registration:

1. You may make statements pertaining to emerging viral pathogens only through the following communications outlets: technical literature distributed exclusively to health care facilities, physicians, nurses and public health officials, "1-800" consumer information services, social media sites and company websites (non-label related). These statements shall not appear on marketed (final print) product labels.
2. Your statements pertaining to emerging viral pathogens must adhere to the format approved on the Agency-accepted master label.

3. You may make statements pertaining to emerging viral pathogens only upon a disease outbreak that meets all the following criteria:
 - a. The causative organism must be a virus that causes an infectious disease that has appeared in a human or animal population in the U.S. for the first time, or that may have existed previously but is rapidly increasing in incidence or geographic range.
 - i. For human disease, the outbreak is listed in one of the following Centers for Disease Control (CDC) publications:
 - A. CDC Current Outbreak List for “U.S. Based Outbreaks” (www.cdc.gov/outbreaks),
 - B. CDC Current Outbreak List for “Outbreaks Affecting International Travelers” with an “Alert” or “Advisory” classification (www.cdc.gov/outbreaks) (also released through the CDC’s Health Alert Network (HAN) notification process)
 - C. Healthcare-Associated Infections (HAIs) Outbreaks and Patient Notifications page (www.cdc.gov/hai/outbreaks)
 - ii. For animal disease, the outbreak is identified as an infectious disease outbreak in animals within the U.S. on the World Organization for Animal Health (OIE) Weekly Disease Information page (www.oie.int/wahis_2/public/wahid.php/Diseaseinformation/WI).
 - A. The CDC or OIE has identified the taxonomy, including the viral family and/or species, of the pathogen and provides notice to the public of the identity of the emerging virus that is responsible for an infectious disease outbreak. Based on the taxonomy of the outbreak pathogen identified by the CDC or OEI, the pathogen's viral subgroup is **small non-enveloped, large non-enveloped, enveloped**.
 - B. The virus can be transmitted via environmental surfaces (non-vector transmission), and environmental surface disinfection has been recommended by the CDC, OIE or EPA to control the spread of the pathogen.
4. You may begin communicating statements pertaining to emerging viral pathogens only upon CDC or OIE’s publication per term 3.a. of an outbreak of an emerging viral pathogen meeting all of the criteria of term 3. You must cease and remove all such non-label communications intended for consumers no later than 24 months after the original publication of the outbreak per term 3.a., unless the Agency issue written guidance to the contrary due to continued public health concerns. The emerging pathogen claim language may remain on the master label.

Terms from points 1 through 4 above shall become immediately void and ineffective if registration for use against Rhinovirus type 37 and Norovirus (Feline calicivirus surrogate) are suspended or cancelled or no longer meets the criteria for a disinfectant claim (see EPA Product

Performance Test Guideline 810.2200). In addition, terms B.1 through B.4 above shall become immediately void and ineffective upon your receipt of evidence of ineffectiveness against any pathogen in a less-resistant Spaulding category.

Should you wish to add/retain a reference to the company's website on your label, then please be aware that the website becomes labeling under the Federal Insecticide Fungicide and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Compliance.

Your release for shipment of the product constitutes acceptance of these conditions. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6. If you have any questions, you may contact disinfectants list at disinfectantslist@epa.gov.

Sincerely,

A handwritten signature in black ink, appearing to read 'D. Fuller', with a long horizontal stroke extending to the right.

Demson Fuller, Product Manager 32

{EPA Reg. No. 84683-3 Directions for Use}

DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its label[ing]. For heavily soiled or greasy areas, pre-cleaning is required.

{Whenever medical devices are listed as applicable sites on the label, the following text box will be included as required by PR 94-4}

This product may be used to pre-clean or decontaminate critical or semi-critical medical devices prior to sterilization or high level disinfection. This product is not to be used as a terminal sterilant/high level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the bloodstream or normally sterile areas of the body, or (2) contacts intact mucous membranes but which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body.

{The statement below may also be used as an alternative to the text box above, when medical settings appear on the label}

[This product is not for use on medical device surfaces]

{Required language for labels with HIV-1 efficacy claims.}

***KILLS HIV ON PRE-CLEANED ENVIRONMENTAL SURFACES/OBJECTS PREVIOUSLY SOILED WITH BLOOD/BODY FLUIDS** in health care settings or other settings in which there is an expected likelihood of soiling of inanimate surfaces/objects with body fluids and in which the surfaces/objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of human immunodeficiency virus Type 1 (HIV-1)(associated with AIDS).

SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV-1 ON SURFACES/OBJECTS SOILED WITH BLOOD/BODY FLUIDS.

Personal Protection: Specific barrier protection items to be used when handling items soiled with blood or body fluids, are disposable latex gloves, gowns, masks and eye coverings.

Cleaning Procedure: Blood & other body fluids must be thoroughly cleaned from surfaces & objects before application of the disinfectant.

Disposal of Infectious Material: Blood & other body fluids must be autoclaved & disposed of according to federal, state & local regulations for infectious waste disposal.

Contact Time: Leave surface wet for 10 minutes.

{FOR DAILY/WEEKLY SPRAY}

[Shake well before use.] [Do not spray [directly] in eyes [or] [on skin]].

TO CLEAN: 1. Wet the surface [with the product] [with the spray] [by [sprayer] [(high or low pressure, hand or power operated)] [or] [cloth, sponge or mop] [[&][and] wipe clean] [(spot test to check surface compatibility)]. [For stubborn stains, let stand for a few minutes.] [Allow to penetrate, then wipe clean.]

{MASTER LABEL}

{All text in brackets [xxx] is optional & may or may not be included on a printed label.}

{All text in braces {xxx} is administrative communication & will not appear on a printed label.}

TO SANITIZE: 1. Wet the surface [with the product] [by [sprayer] [(high or low pressure, hand or power operated)] [or] [cloth, sponge or mop] [(spot test to check surface compatibility)]]. 2. Leave for 30 seconds. Allow to air-dry. No rinsing [or wiping] is required [(even on food contact surfaces)].

TO DISINFECT [&] [and] DEODORIZE: 1. Wet the surface [with the [product] [spray]] [by [sprayer] [(high or low pressure, hand or power operated)] [or] [cloth, sponge or mop] [(spot test to check surface compatibility)]]. 2. Leave for 10 minutes. Allow to [air-] dry. No rinsing [or wiping] is required [(even on food contact surfaces)].

{Optional Directions to be printed on refill and refillable bottles}

TO REFILL [THIS CONTAINER]: 1. Remove the [sprayer] [spray head]. 2. Fill bottle from refill container [of this same product] [to about 1 inch below top]. 3. Replace the [sprayer] [spray head]. **[Refill only with this product].**

[[Ready to use] Do not dilute]

TO DEODORIZE: 1. Wet the surface [with the [product] [spray]] [by [sprayer] [(high or low pressure, hand or power operated)] [or] [cloth, sponge or mop] [(spot test to check surface compatibility)]]. 2. Allow to [air-] dry. No rinsing [or wiping] is required [(even on food contact surfaces)].

{FOR FOGGING PRE-TREATMENT}

FOGGING INSTRUCTIONS: For ULV fogging in contained vacant areas as part of pre-cleaning or contamination control (knock-down) in restoration or remediation sites, as a supplement to final cleaning and disinfection.

This is a ready-to-use product; do not dilute. After setting up fogging device, seal all windows & doors to confine the fog & leave area during the treatment time recommended by the device manufacturer. After fogging cycle is complete, fully ventilate the treated area until suspended product is purged prior to re-entry. Do not enter the fogged area until the fog has completely settled or exhausted. Do not use equipment in the fogged area until the treatment has dried. After fogging pre-treatment, follow the product label's cleaning & disinfection directions.

{FOR TOILET BOWL}

[CLEANING INSTRUCTIONS] TO CLEAN [& DEODORIZE] [TOILET BOWLS]:

[Twist nozzle to on-or-twist to open.][Squirt] [product][gel] under rim [and cover the inside of the toilet bowl evenly]. [Wait] [10 minutes] [then brush and flush].

[SANITIZING INSTRUCTIONS] TO SANITIZE [& DEODORIZE] [TOILET BOWLS]:

[To kill 99.9% of bacteria] Empty toilet bowl of water and any other contents, squirt [product][gel] under rim to cover surface. Wait 30 seconds, then brush and flush.

[DISINFECTING INSTRUCTIONS] TO DISINFECT [& DEODORIZE] [TOILET

BOWLS]: Empty toilet bowl of water and any other contents, squirt [product][gel] to cover surface. Wait 10 minutes, then brush and flush.

{FOR CARPET SPOT TREATMENT}

{MASTER LABEL}

{All text in brackets [xxx] is optional & may or may not be included on a printed label.}

{All text in braces {xxx} is administrative communication & will not appear on a printed label.}

TO [CLEAN] SANITIZE [& DEODORIZE] CARPETS: [Apply to][Spray][Saturate] the pre-cleaned carpet area [with the product] [with[by] [[light]wand],[high [or low] pressure][sprayer], [[hot water] extractor], [spin bonnet] or [immersion] [processes][application]] until [thoroughly wet] [saturated] [(spot test fibers for colorfastness before use)]. Scrub or agitate the carpet as needed to ensure the [test substance] [product] [solution] is delivered throughout the carpet pile and backing. Allow the test [substance] [product] [solution] to remain on the carpet undisturbed for a minimum of 60 minutes. [[Rinse][Extract][with clean water] & allow to air dry.]

TO [CLEAN] [&] [DEODORIZE] CARPETS: [Apply to][Spray][Saturate] the carpet [rug] [with the product] [with[by] [[light]wand],[high [or low] pressure][sprayer], [[hot water] extractor], [spin bonnet] or [immersion] [processes][application]] [until [thoroughly wet] [saturated]] [(spot test fibers for colorfastness before use)]. [Scrub or agitate the carpet as needed.] [[Rinse][Extract][with clean water] [&] [allow to air dry.]

{FOR MONTHLY FOAM}

TO CLEAN: 1. Wet the surface [with the spray] [& wipe clean]. [For stubborn stains, let stand for a few minutes.][Allow foam to penetrate, then wipe clean.]

TO SANITIZE: 1. Wet the surface [spray surface] [(spot test to check surface compatibility)]. 2. Leave for 30 seconds. Allow to air-dry. No rinsing [or wiping] is required [(even on food contact surfaces)].

TO DISINFECT [& DEODORIZE]: 1. Wet the surface [by sprayer, cloth, sponge or mop] [(spot test to check surface compatibility)]. 2. Leave for 10 minutes. Allow to air-dry. No rinsing [or wiping] is required [(even on food contact surfaces)].

List of Organisms that may be inserted as Indicated in Optional Statements
or Tabulated – Table 4}

This product [is a broad-spectrum] [health care facility] [disinfectant] [[is] proven to kill over 99.99% of the designated test microorganisms required for broad-spectrum claims of [hospital] disinfectant effectiveness.] [has demonstrated efficacy against the following specific organisms:]

Organism	ATCC No.
Bacteria:	
<i>Pseudomonas aeruginosa</i>	15442
<i>Salmonella enterica</i>	10708
<i>Staphylococcus aureus</i>	6538
<i>Methicillin Resistant S. aureus (MRSA)</i>	NARSA NRS384, USA300
<i>Escherichia coli</i>	35150
Viruses:	
<i>Influenza A virus</i>	ATCC VR-544
<i>Influenza A Avian (H3N2) virus</i>	VR-2072
<i>Rhinovirus type 37</i>	VR-1147
<i>Human Immunodeficiency Virus (HIV) Type 1</i>	Strain HTLV-III _B
<i>Norovirus (Feline Calicivirus, as the surrogate)</i>	ATCC VR-782
Fungi:	
<i>Candida albicans</i>	10231
<i>Trichophyton mentagrophytes</i>	9533
30 Second Food Contact Sanitizer:	
<i>Escherichia coli & Staphylococcus aureus</i>	11229 & 6538
Carpet Sanitizer:	
<i>Enterobacter aerogenes</i>	13048
<i>Staphylococcus aureus</i>	6538
<i>Pseudomonas aeruginosa</i>	15442
Mildewstat:	
<i>Aspergillus niger</i>	6275

EMERGING VIRAL PATHOGEN CLAIM

For an emerging viral pathogen that is a/an...	...follow the directions for use for the following organisms on the label:
Enveloped virus	Rhinovirus type 37
Large, non-enveloped virus	Rhinovirus type 37
Small, non-enveloped virus	Rhinovirus type 37 Norovirus (Feline calicivirus surrogate)

{Emerging Pathogen Claims – This product meets the criteria for use against emerging enveloped viral pathogens; large, non-enveloped viral pathogens; and small, non-enveloped viral pathogens when used in accordance with the use directions for Norovirus and Rhinovirus type 37. Per the Guidance to Registrants, these statements will only be permitted as non-label claims when emerging viral pathogen conditions are met.

The following statements shall be made only through the following communications outlets: technical literature distributed exclusively to health care facilities, physicians, nurses and public health officials, "1-800" consumer information services, social media sites and company websites (non-label related). These statements shall not appear on marketed (final print) product labels.}

- [Product name] has demonstrated effectiveness against viruses similar to [name of emerging virus] on hard, non-porous surfaces. Therefore, [product name] can be used against [name of emerging virus] when used in accordance with the directions for use against [name of supporting virus(es) from table above] on hard, non-porous surfaces. Refer to the [CDC or OIE] website at [pathogen-specific website address] for additional information.
- [Name of illness/outbreak] is caused by [name of emerging virus]. [Product name] kills similar viruses and therefore can be used against [name of emerging virus] when used in accordance with the directions for use against [name of supporting virus(es) from table above] on hard, non-porous surfaces. Refer to the [CDC or OIE] website at [website address] for additional information.
